

BlenderExchange™ is a marketplace for our customers to share proven best practices and educational resources with other BlenderLearn™ users. Instructional content is tagged by source and publisher so the appropriate resources are available to the appropriate BlenderLearn iCMS users. Future Blender Exchange users will have the opportunity to both contribute to, and pull content from, the exchange.

School District Challenges

- Share your existing district created content with other districts throughout the country
- Widen the resources for your district's teachers and students
- Safe place to collaborate with others and share ideas

Solution Benefits

- Instant access to other district-created content throughout the country
- Easy to use and access
- Share and collaborate with your peers
- Single-click filtered searches
- One access point
