

Personalizing Teaching and Learning

An eco-system of innovative applications designed to drive student, teacher and school improvements by facilitating and promoting personalized learning.

- Instructional Content Management System
- Early Warning System
- Individual Learner Profiles

Why BlenderLearn ?

- **Modular** applications support a strategic, phased approach to implementation; allowing priority needs to be met first while building toward a broader vision
- **Integrates** with legacy technology
- **Flexible configurable framework** to easily scale and adapt to changing needs. Platform administrators can configure as people or priorities change
- **Personalized dashboards** for each user to conveniently access relevant information, action plans and progress reports in one location
- **Single sign-on** so users can save time by entering login credentials once and access all role appropriate sites and technology
- **Easy to use** for end users as well as platform administrators
- **Secure system** with multi-phased authentication; FERPA and HIPAA compliant data center; as well as compliance with other industry aligned privacy regulations
- **Data Driven** to support better decision making and facilitate a cycle of continuous improvement
