

CONTINUOUS OUTCOME IMPROVEMENT

 | Powered by 
MAKING POP HEALTH MANAGEABLE

Population Health Management is on everyone's mind: How can healthcare institutions provide better care to patients in today's value-based environment? Meeting today's healthcare priorities demands more than yesterday's technology. **TopCare powered by Blender™** is a software solution that revolutionizes the way healthcare communities use data to drive results through improved patient outcomes, quality performance and real cost savings.

TopCare provides clear solutions to managing population health and risk. **TopCare** concentrates on the cost effectiveness of care by supporting clinical interventions.

TopCare powered by Blender™:

- **Targets quality metrics through disease-specific patient rosters**
- **Identifies patients at high risk for readmissions, gaps in preventative care and/or in need for follow-up care**
- **Coordinates patient care and collaboration with the Care Team**
- **Organizes, prioritizes and sequences quality improvement activities**
- **Administers “WorkSpaces™” to share best practices and lessons learned**
- **Recommends patient-specific education resources for self-management**
- **Offers flexible and real-time analytics and reporting**
- **Communicates securely with patients through mobile applications**
- **Leverages your existing IT structure**

Collaboration and communication are key to creating healthy communities. Empowering data to become more than mere words and numbers, **TopCare** launches your data into action — inspiring best practices, better patient care and healthier populations.

Find out how **TopCare manages data to make collaborative, proactive, cost-effective patient care a reality.**
