Projects and Challenges

The School District of Palm Beach County

Challenges

- **Transfer entire repository of approximately 50,000 pieces of digital content** -- courses, units, lesson plans, and learning object resources
- **Migrate 11,000 teachers** from an existing technology used every day to access mission-critical instructional resources
- **Integration of new system** with an existing, mandatory textbook adoption process and new lesson plans generated each year by a variety of publishers
- **Transition district-level curriculum staff** to the new application with confidence
- **Getting buy-in from stakeholders** for a new system, when current system has been successfully used for nearly a decade

Hamilton County

Challenges

- **Re-engage struggling learners** by redesigning classroom instructional practice to meet the reality of today's fast paced, technologically advanced world
- **Encourage students to take ownership of their own learning** and prepare them for careers and/or college by giving them the opportunity to attain work credentials
- Acquire contemporary learning instructional practices needed to **transform teacher delivery methods** and classroom instruction to **promote blended learning**
- **Empower disengaged students to reduce dropout rate**, and prepare students for college and career.

HENRY COUNTY SCHOOLS

Challenges

- Provide students and families with significant **voice and choice** related to **what, when where and how they learn**.
- Help Teachers provide **more one-on-one instruction time** and play an even more essential role in student learning
- Provide a new comprehensive approach to defining, tracking, and executing a **personalized learning plan for each student**

Iowa Department of Public Health

Challenges

- **Expand existing Home Visitor Program** --reaching 5% of at risk families -- throughout rural Iowa to potentially reach 100%
- **Reduce family risks** and **optimize parenting** resourcefulness, family resilience, child growth, and school readiness
- Create an online community in real time to address **individually-relevant issues and information** that adapts as parents and children mature through pregnancy and early childhood years.
