Pop Health Analytics
for Patient Engagement

Why us?

Pop Health IT Is What We Do. And, We Do It Really Well.

Our solution TopCare, has been successfully facilitating Pop Health for more than 12 years.

TopCare was designed by a clinicians at the Massachusetts General Hospital Laboratory of Computer Science to advance patient-centric care by successfully engaging patients in their care and tightly aligning care delivery through smart surveillance, communication and escalation.

The success of TopCare is well documented in dozens of Peer-Reviewed publications in academic journals.
